

### **Creation Commandment Nine: Getting ready for Humans**

Genesis 1:24 And God said, “*Let the earth bring forth living creatures of every kind: cattle and creeping things and wild animals of the earth of every kind.*” And it was so.

Ah the bug spot! This command of creation number 9 is our introduction to animals and bugs. I always wondered how bugs fit in. For the most part humans have spent an eternity trying to kill them. I have heard it said that the one thing that would survive a nuclear holocaust was bugs. Not to underscore animals. All that the Lord made, so long ago, has survived. Whether it's Darwin to random evolution, creation has survived.

God is not one dimensional. It's like humans to make a singular God do one thing. Zeus is the god of thunder. He is not the god of love. There is Hades the god of the underworld. The Jewish God is odd. He does not conform to the ways of the deities in the human world. Why can't you make an idol to God? It's because he is the multi-dimensional God. Zeus is called Zeus. Hera is called Hera. The Jewish God is called Yahweh (Lord), Adonai (master), El Olam (everlasting). It makes sense that God is also called the Trinity (three in one). This God head is made up of the Father, Son, and Holy Spirit. What I'm getting at is that God would create multi-dimensional creatures. Why? It's his nature to be more than one thing.

With that said, God created plants and their kinds. We have several different pine trees and roses. The birds of the air and fish in the sea were commanded into being. Then God made them by their kinds. We have the ostrich and the dove. The Whale and the Mino. Yet, each time God

made the template and then expanded on it. I have heard guys say that you should never buy a car that is a first edition. They have to work the bugs out. God worked the bugs in by the 9<sup>th</sup> command of creation.

Is that why we survived all these years? Are plants adaptable because God made different kinds? I have been so stunned when people say it was random creation. Did that person ever think about (and study) a pelican and a humming bird. Have you taken a good long look at a crocodile and a lion? People try and link an ape to a man. Yet, two types of creatures in their own species like the humming bird and pelican can't be more different, yet their birds. What exactly does a crocodile and a lion have to work with? The multi-dimensional God made multi-dimensional creatures by their kind.

I am fascinated with anti-God people. They accept that an explosion made a humming bird and a newt. They also except that we were vegetarians in the beginning. Some have even quoted the Bible to bolster their point. We were not meant to eat meat. Yet, God created cattle. He created fish and plants. Ironically, humans eat them all. Ok, back to the bugs. God basically told us not to eat them. Why are they here! It even says God created wild animals. Cattle are not wild or domesticated. Cows do what cows do. Same with bugs!!

*Genesis 1:25 "God made the wild animals according to their kinds, the livestock according to their kinds, and all the creatures that move along the ground according to their kinds. And God saw that it was good."*

This book is going out of its way to say God made the kinds. The Bible is drawing a line in the sand in regards to Darwin. A line in the sand with the Big Bang Theory. I still think that theory is possible. That does not deny that God didn't do it. How do people reconcile that bears

are all over the planet, yet the Venus Fly Trap is in a swamp in North and South Carolina only? I'm not a fan of being a God Apologist. Yet, only a blind man can't tell that every creature and plant on this planet is unique and different.

We are now at the end if it. Of what? Everything that a human need to survive has been created. I am stunned at the anti-creationists. The people that think the Bible is so dumb. The first 9 commands of creation methodically set up the earth to support humans. It says in Genesis 2 that the animals were actually made to be helpers of humans (vegetarian alert). In our next command God tells the man that he will take care of and rule all these creatures. One piece at a time, God is setting the stage for man to appear. Even the atheists believe animals came before humans. The Bible is not that dumb or wrong as they think.
