Past Covid: Reality Bites

Breaking news! We are nearing two years of Covid and the 4th wave is rolling into the 10th wave! To be fair were still only on the 4th. Yet, we have also flattened the curve and been locked down sort of twice or more? Economies have bounced back and masks are gone? Well, none of this has happened yet. In my province, the government has turned to dictatorship to flatten the curve. The unvaccinated are now the problem. Covid is not a problem. Government policies are not the problem. It's only the unvaccinated.

Reality is saying that humans cannot beat this thing. Oh, sure we have a vaccine that is working? The numbers are higher than when we were all unvaccinated. Even the vaccinated have to wear masks. Reality is saying we cannot control what we cannot see. What is really going on? Ok, what does this have to do with travel? The wife and I did indeed get double vaccinated. I'm sure it will be quadruple vaccinated before long. Yet, planes, ships, and entertainment are still restricted and masked. Only the vaccinated may attend but we have all the same restrictions as the unvaccinated do. So...?

We got vaccinated because our jobs demanded it. We did take a peek at travel. Might as well join the herd. Yet, would we travel to a relaxing destination with masks, restrictions, and such? Is it relaxing to do all the same things in the real-world while on vacation? I thought a vacation was to get away from life? What is relaxation? Is it saying you got away? Is wearing a mask while being double vaccinated being safe? From...? The unvaccinated that are the enemy? Why are they the enemy? If an unvaccinated person is carrying covid, are they carrying or sick? The vaccinated can't carry it, get sick from it, or transfer it?

Why would I take the Covid world on vacation? It just might feel like I never left home. To top that off you have to shell out money being tested before, during, and after your trip regardless if you have been vaccinated 10 times. Would I go to a hot destination in a mask? Would I mask up on a beach, boat, or historical sight? Would all my pictures be masked? If I'm sick of the whole mess in my work life, why would I have created Covid memories on vacation. Vacation from what when you bring Covid along for the trip? I'll wait! Forever?
